Summary

First-year IT student and competitive hackathon winner (1st Place at Solve For Her Hackathon, 2nd Place at Singularity AI Parsec 6.0) dedicated to architecting high-impact software, offline AI tools, and full-stack solutions.

Education

- **Maharaja Agrasen Institute of Technology (MAIT)** — Delhi, India
  Bachelor of Technology - Information Technology (IT) — *Aug 2026 – Aug 2029*
- **Kendriya Vidyalaya Pragati Vihar** — Delhi, India
  High School Diploma - Computer Science — *2024*

Skills Summary

- **Languages**: Python, TypeScript, JavaScript, C/C++, SQL
- **Frontend & Web**: React 19, Tailwind CSS, HTML5, CSS3, Vite
- **Backend & APIs**: FastAPI, Node.js, MongoDB, RESTful APIs, Uvicorn
- **AI & Tools**: Google Gemini Multimodal API, Scikit-learn, Git, GitHub, Linux Shell, Pydantic

Projects

- **Nukkad — Hyperlocal Commerce & Retail Intelligence** — Full-Stack Project
  React 19, FastAPI, Google Gemini API, Tailwind CSS — *Delhi, India*
  - **Multimodal AI Vision**: Integrated Google Gemini Vision API to analyze product images, auto-extracting SKU attributes, category, and catalog metadata for zero-friction inventory management.
  - **Live Price Intelligence Engine**: Built a FastAPI scraping engine cross-referencing Amazon and Flipkart data to deliver real-time, AI-verified competitive pricing for neighborhood merchants.
- **Recall** — Personal Project
  100% Offline AI Search System — *Delhi, India*
  - **Offline AI Search**: Built a 100% offline AI search system that allows users to find local files using natural language.
  - **Data Privacy**: Eliminated data privacy risks by processing all semantic queries and file indexing strictly on-device.
- **Solve For Her** — Hackathon Project (Winner)
  Women's Safety Application — *Delhi, India*
  - **Emergency Alerts**: Led a team to develop a women's safety application featuring offline SOS triggers, automated location sharing, and real-time alerts.
  - **Offline Protocols**: Engineered low-latency emergency protocols that run without active internet connections to ensure reliable usage in network-dead zones.
- **Sehat Link** — Telemedicine System
  Secure Video Consultation Platform — *Delhi, India*
  - **Video Consultations**: Developed "Sehat Link," a telemedicine platform facilitating direct, one-to-one secure video consultations between patients and doctors.
  - **Healthcare Access**: Improved medical accessibility by integrating real-time scheduling and virtual appointment features, reducing clinic visits.

Hackathons & Honors

- **Solve For Her Hackathon — Project Competition** — Secured 1st Position (Winner)
  Women-Centric Safety Innovation Track — *2024*
  - **Championship Win**: Awarded 1st place for architecting a resilient women's safety application that operates without active cellular internet, utilizing peer-to-peer triggers and low-latency SMS/mesh protocols.
  - **Leadership & Execution**: Pitched working prototypes to industry judges, demonstrating under-5-second emergency dispatch time and automated live coordinates sharing.
- **Singularity AI Hackathon (Parsec 6.0)** — Secured 2nd Position (Runner's Up)
  Regional Technical & AI Contest — *2024*
  - **Regional AI Finalist**: Secured 2nd place among competitive engineering teams for developing and deploying an intelligent AI solution addressing complex real-world data under strict 24–48 hour hackathon timeframes.
  - **Technical Defense**: Commended by jury for model design efficiency, high accuracy benchmarks, and clean full-stack demo implementation.
